How an Overseas Officer Can Help Our Manufacturers

by Roy Fox, British Trade Commissioner, Winnipeg

TO ARRIVE in Winnipeg late in the evening to be greeted by a temperature of —35°, after a spell in Nairobi not far enough behind to be forgotten might not be everyone's idea of fun. But to the newly arriving Trade Commission this is all part of the game, part of an interesting and very full life. For this means another challenge, another set of acquaintances and friends, new customs, new traditions, new clubs, perhaps new hobbies and certainly, in many ways, a new approach or a new slant to the job according to local circumstances.

To be greeted at a first meeting by the use of one's Christian name is perhaps not common but is none the less pleasant. This City of Winnipeg must surely be one of the most hospitable in the world with a marked friendliness towards Britain and a reasonable understanding of Britain's problems. Thus the Trade Commissioner's first job of getting to know government and business leaders in the community and to make himself known is not difficult. There are, too, many opportunities in the early days for meeting many people in the group in addition to personal calls. The cocktail party, nothwithstanding criticism levelled against it, has many advantages for the Trade Commissioner and his wife, both at home and away, and business has been done in this way no less than in a London club or a Bradford coffee house.

THANKS VIA THE PRESIDENT

Below are extracts from two letters received by Mr. Frederick Erroll, President of the Board of Trade, last month:

I should like to let you know how extremely helpful your Trade Commissioners were to myself and my colleagues during a recent visit to Nigeria.

Assistance of this kind is of considerable value to people travelling abroad in the interests of our export trade and I felt I should let you know personally how much this was appreciated . . .

(Signed) H. Marston Riley,
Managing Director,
British West Africa Corporation Ltd., Birmingham.

I have recently returned from a visit to New Zealand where I had to go at rather short notice having regard to the change in the Import Tariff by the New Zealand Government.

I am very glad to say that my mission has proved successful and I now wish you to know that I could not have succeeded at all had it not been for the considerable help I received from three of your officers . . .

I, and this Company, are deeply grateful for the efforts of the British Board of Trade and the representatives I have mentioned.

(Signed) L. Gordon Gee,
Managing Director,
British East-Light Ltd., Essex.

Mr. R. H. Edmondson (right), Exhibitions and Fairs Branch, Board of Trade, presenting a cheque for £18,000 to Mr. L. L. Wathen, acting chairman of the fairs committee of the Melbourne Chamber of Commerce. Mr. J. W. Stoodley, Principal British Trade Commissioner in Victoria and Tasmania, looks on. The payment is for half the cost of renting 40,000 sq. ft. of floor space at the second Melbourne International Trade Fair to be held by the Chamber of Commerce from February 27 to March 2, next year.

Lunches and dinners flow regularly through the timetable and one must always be prepared to say a few suitable words at these functions. Nor are platitudes the order of the day, for most individuals present really want to hear the views of the guest and what he has to say on behalf of Britain and its exporters. Just as the personality of the visiting managing director or salesman will go a long way towards clinching a deal so the impression made by a Trade Commissioner through his personality, his interest and his dedication, will leave a mark which might well result in a more favourable attitude toward Britain or a greater disposition on the part of those who influence buying to look across the Atlantic where they might not have done before. Moreover, as any salesman knows, this impression of a personality may well lead the client to remember the company or even the country of the man who sold himself well. The value of this dovetailing of personalities cannot be over-emphasized.

An official trade representative must be prepared, especially at the start, to accept many invitations to speak at meetings of societies, trade associations, business forums, fellowship clubs and the like, and also to talk at television and radio interviews. These functions

Some of EMI's latest electronic equipment was shown during a six-country four months long tour of Europe which ended last month. The 35 ft.-long 12-ft. high EMI Electronic Ltd. demonstration vehicle visited Holland, Germany, Switzerland, Italy, France and Belgium. In two previous Continental tours the EMI vehicle, seen here between the Colosseum and the Arch of Constantine in Rome, visited Hungary, Poland, France, Holland, Belgium, Germany and Switzerland. This tour was part of an export drive by EMI Electronics Ltd. which in the past 12 months has held demonstrations throughout Europe, in Africa and in the United States.

have two main benefits; firstly that these are useful ways of meeting people and secondly, that the name of Britain and the name and functions of the British Trade Commission can be hammered home to suitable audiences. Thus, also, a background can be obtained so that business visitors from Britain can be taken to see the people they ought to meet if their knowledge of the area and its business community is limited. But on this point, too, business visitors might remember that even if they have their contacts and know their way around, Trade Commissioners always welcome the opportunity to have a chat with them. It is appreciated that the visitors' time is limited for obvious reasons but this is very much a two-way traffic and it is not beyond possibility that new openings for sales could be discovered. Many examples of such developments can be quoted and not infrequently visits of British businessmen who could have been helped directly are not discovered until after they have left the area.

More directly the Trade Commissioner and his staff have to be on the alert to report trade opportunities back to Britain as soon as they arise. This involves close and regular contact with the provincial Government Departments from the Premier down through the Ministers to their purchasing agents, engineers, and so on. In the same way it is essential to know well all the individuals in industry and commerce who might influence the buying of goods or machinery on a regular basis or as part of a new development. Visits made within the past few weeks to Hudson Bay Mining and Smelting Company at Flin Flon, Manitoba, producers of lead, zinc, and copper, and to International Nickel Company at Thompson, Manitoba have, in the first place, revealed a ready willingness on the part of these companies to buy from Britain whenever and wherever we can put forward a good proposition.

It is not for one moment to decry the efforts of British companies and their Canadian agents when the comment is made that it would be pleasant to record more frequent visits to these and other potential purchasers. Canada is a vast country and it is not always easy to justify the expense of frequent visits, especially to outlying areas. But there is undoubtedly a lack of information about many first-class British products which often causes purchasing agents automatically to approach Canadian and American concerns to the exclusion of others. Where British firms have cultivated Canadian companies, their record of success is in many instances quite rewarding, especially if after-sales service and supply of technical information and parts is adequate.

This leads on to one of the most important areas of cultivation and investigation for the Trade Commissioner, that of the local agent or distributor. Inevitably, as time goes on, the first-class agent is more difficult to find. But comprehensive records are kept of local agents, the lines they handle, the territory they cover, their sales staff and their ability to stock or handle British products. All this information is available to British companies on request from either the Export Services Branch of the Board of Trade in London or direct from overseas posts; information on this and other aspects of trade promotion work is of course also regularly exchanged between the different Trade Commission posts in Canada. Agency inquiries from Britain are constantly being discussed with suitable agents and appreciations of the market culled from these and other discussions are being sent back home in a running stream. The maximum information about the products concerned is, of course, invaluable together with any particular points of interest or appeal. Specific questions are invited so that the needs of the inquirer can be faithfully and accurately placed before the potential agent. A plea for tolerance on the time factor would be useful here. It may well happen that a good agent shows interest at the start but he may need a few weeks to explore the market thoroughly before accepting the agency. This is a precaution or an attitude which should be encouraged for the quick and ill-considered signing of an agreement might cause recriminations afterwards when one or the other side is not satisfied with the results. An acceptance based on full investigation gives much more often a satisfactory outcome. But, of course, it is important that an interim note should be sent to tell the British firm exactly what is happening.

Similarly talks with firms and individuals in the Prairie Provinces of Canada have already brought forth the comment that quick and full replies to correspondence 'across the water' are of paramount importance and go a long way to cementing good relationships

(*Continued on next page*)

Exporting to Canada (*Continued*)

between supplier and agent and supplier and buyer. It is doubtful whether there is any other single factor which can influence these partnerships to the same degree.

An important part of the Trade Commissioner's job is to listen to complaints about British exporters to Canada and complaints from Britain about Canadian importers. An excellent example of this was a case in which it was vital to have delivery of a machine at such a time that it could be transported across a frozen lake before thaw. After the ice had become unsafe there would have been a loss of time and a greater cost of delivery. The local factors which might not have been easily or quickly appreciated at home were explained by the Trade Commission.

It is absolutely essential to explain and emphasize that any correspondence from a Trade Commissioner or interviews or telephone calls resulting from reports sent back to Britain about complaints from Canadian importers should never be construed as a way of 'getting at' or decrying the efforts of a British firm. No Trade Commissioner can have an interest in anything but constructive ideas as he represents part of a team working for Britain as a whole. It is always fervently hoped that British industry will accept comments in this and no other spirit just as the Trade Commissioner is delighted to have direct advice from firms as to exactly how he can be of maximum assistance.

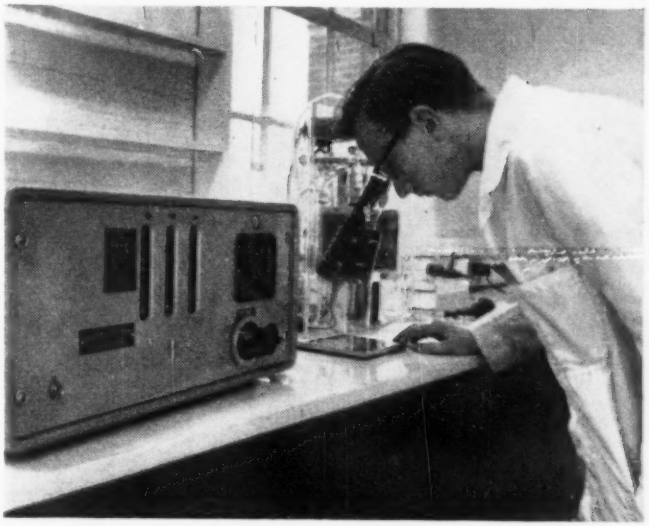
The average per capita personal income in Manitoba, Saskatchewan, and North West Ontario, is between $1,400 and $1,500 per annum. The figure fluctuates according to the crop yield and last year's drought reduced the income of the farmers. The agricultural outlook this year is better and although seeding has been delayed in some areas by heavy rains, the general feeling is one of optimism as the amount of moisture in the ground has increased. This is not to say that the economy of the area is still as dependent on agriculture as it was many years ago. In Manitoba for instance, the value of mining output was $99 million in 1961 and manufacturing $770 million as against income from agriculture of $263 million.

Similar developments towards greater industrialization can be seen in Saskatchewan and North West Ontario; in the latter territory for instance mining of iron, gold, copper, silver, lead and zinc accounted for $75 million in 1961, while in Saskatchewan the recent developments in potash which have already been reported (details of which are available at Export Services Branch) are clearly going to make an appreciable contribution to Sackatchewan's economy. Although it is obvious that the number of mining claims does not automatically mean that a rise in mining production will follow immediately, it is interesting to note that the number recorded in Manitoba in 1961 was 8,078 as against 6,702 in 1960.

The value of manufacturing output given above is an example of the trend towards industrialization. Winnipeg, of course, with a population of about half a million, is the main area of industry and apart from service industries, the production figures are increasing in food and beverage manufacturing, clothing, paper and wood products, chemicals, electrical apparatus and metal products.

The scope of this article does not take in a more detailed description of the economy. The main points to be made are that Canadians in this area would be glad to buy from Britain where Britain can offer competitive prices, after-sales service, and reasonable delivery. It must be said again that this can be done over a large field and very often we do not get a larger share of the market because the potential purchasers do not know enough about our products or because British manufacturers are not well enough informed about the market. These are links which Trade Commissioners can help to forge.

Record Paint Exports



The British paint industry with a total annual production valued at over £30 million, last year sold more to the home and export markets than ever before and is now one of the world's leading exporters. Sponsored by the paint industry and with Governmental help, the Paint Research Station at Teddington tackles problems ranging from fungi formation to high-fidelity colour matching. This machine installed there is a Coulter Counter and is used to obtain the exact rather than the average particle size of the pigments used in paint manufacture. In less than half an hour the machine will produce an accurate count of the number of particles, each of which may vary from 1/5,000th to 1/1,000,000th of an inch in diameter, contained within a grain of pigment.

Letters of Appreciation

How Overseas Posts Help U.K. Exporters

The letters quoted below have been sent by U.K. exporters or their representatives to overseas officers expressing appreciation for their assistance in furthering export business. A list of United Kingdom commercial representatives overseas appears on pages i to viii

ZURICH

Last October, in an endeavour to open some accounts in Switzerland for our products, I called on you for possible assistance and your assistant introduced me to one or two people personally, and gave me a telephone introduction to another.

Although my calls did not produce anything very startling initially, we are now sending quantities of furniture into Switzerland.

I felt it proper to let you know of this development, especially as your department were instrumental in initiating matters. I hope to be in Zurich again on Monday May 28th, and, all being well, will visit you.

Many thanks for your assistance in enabling us to make some sort of inroad into the Swiss market.

Parslow Furniture Ltd., High Wycombe

TORONTO

We thank you for your letter, and for the very precise comments offered regarding the sale of the above in your territory.

We feel you have gone to an immense amount of trouble, for which we are really grateful.

Edward W. Turner & Son, Liverpool, 3

HONG KONG

We have received a most interesting report from Mr. D. E. Allsopp our Deputy Managing Director and he has made it quite clear to us that for much of the vital information gained, he is indebted to you. Consequently we would like to add our thanks to those of Mr. Allsopp for the very great trouble you obviously went to to make his visit worthwhile and we sincerely hope that this will be the start of successful trading in your market.

H. Frost & Co. (Engineers) Ltd., Walsall

CHICAGO

Many thanks for your letter. We have no doubt that the details supplied will be of great value to us in our efforts to sell Mullard magnets in the United States.

Mullard Overseas Limited, London

MELBOURNE

It may be of interest to you to know that I have already received a small order for some of our crane seats from one of the Australian manufacturers to whom I wrote about a month ago, and I have samples under consideration by two other companies.

I therefore feel that my efforts to secure footing in the Australian market are progressing quite well, and I hope for good things in the very near future. Your efforts on my behalf have been a considerable contributory factor in this, and I would again like to put on record my sincere appreciation.

HOUSTON

I would like to express my thanks to you once again for the assistance and courtesy extended to me by yourself and your staff during my brief visit to Houston.

In general it looks as though my American trip will prove quite fruitful, and this is in no small measure due to the very ready help I received from the Consular Commercial Staffs in the various cities visited.

Haybridge Steel Co. Ltd., Wellington, Shropshire

During his recent tour of the Middle East (see *Board of Trade Journal* of July 13), Mr. Miles Reinhold, Trade Relations Officer of the Middle East Association, addressed several gatherings of local businessmen in the main trading centres. Here he is seen (*right*) at a meeting of leading Kuwaiti merchants, arranged by the Kuwait Chamber of Commerce. Sayed Yacoub al Hamad (*third from the right*), Vice Chairman of the Chamber, listens as Mr. A. B. Ball, British First Secretary (Commercial) in Kuwait, makes a point.

LISBON

I would like you to know how very grateful I am to you for all your help, patience and advice to me during my visit to Portugal. I had never really appreciated before how pleasant it could be to have a friend and counsellor in a strange land and what tremendous help our Embassy could be. I confess I had always looked upon your profession before as a rather aloof thing concerned only with high politics, Queen's Messengers and diplomatic immunities!

Now I know a great deal better and thank you most sincerely for having opened my eyes in such a kindly way. I hope that our cattle venture will not become too much of an imposition to you but I do think that there is very real interest now in the Hereford Breed, which could be of significant importance to our export trade.

The Hereford Herd Book Society, Hereford

NEW ORLEANS

I am taking this early opportunity of thanking you for the help which you extended to both Mr. Rathbone and myself during our visit to Louisiana.

Our meeting with Mr. Underwood which you were instrumental in arranging, was very useful indeed and allowed us to learn in a short space of time what otherwise may have taken us weeks to accumulate.

Our visit to the sugar estate was also valuable and I hope that, with the plans which we are proposing to initiate in our North American operations, eventually we shall be able to secure some of the business in Louisiana which at present is passing us by.

Renold Chains Ltd., Manchester

AUCKLAND

Thank you for your recent letter and for your efforts on our behalf. We shall be writing to the addresses you gave us shortly, and in the meantime would like to express our appreciation of your assistance for which we are very grateful.

Turkish Liras for Imports

THE AGREEMENT between H.M. Government and the Government of Turkey of December 9, 1960 (Cmnd. 1256), which provided for the use of TL91 million held by H.M. Government in Ankara (see *Board of Trade Journal*, December 23, 1960) has been further extended to December 1, 1962, in respect of the balance of the liras, amounting to TL19½ million for cultural purposes, and about TL12½ million for the purchase of tobacco and certain agreed commodities.

The Agreement provides that in the period ending December 1, 1962, up to TL12½ million will be available for purchases made by traders resident in the United Kingdom for consumption within the United Kingdom, of the following products: fresh fish in ice; frozen fish, whole or fillets; smoked, dried or salted fish; canned fish; fish oil; fish meal; low grade chrome ore containing 46 per cent. Cr.203 or less; chrome concentrates; colemanite; boracite; fresh fruit (except fresh lemons); or any other products which may be approved by the Turkish Government and notified by them to H.M. Embassy in Ankara.

In addition, clause (a) of the 1960 Agreement has also been extended until December 1, 1962. Clause (a) provides that the liras may also be freely used for the purchase of Turkish leaf tobacco of all kinds and origins of the 1956, 1957 and 1958 crop years (excluding, in the 1958 crop year only, the American Grade 'A' tobacco of Samsun, Bafra, Izmir and Bursa) for consumption anywhere in the world, and also for the purchase of any kind of Turkish tobacco for consumption within the United Kingdom. The Turkish Government will freely accept such liras for purchases to be effected by traders of any nationality resident in other countries as well as in the United Kingdom.

Importers wishing to purchase these liras for use under the above arrangements should, through their bankers, approach the Bank of England. The Bank will be prepared to receive bids in writing up to August 31, 1962, from banks on behalf of their customers.

United Kingdom Loan to United Arab Republic

AN AGREEMENT was signed in London on Wednesday under which the United Kingdom is making a loan of £3,575,000 to the United Arab Republic.

Mr. Mohamed El Kony, Ambassador for the United Arab Republic in London signed on behalf of his Government and Mr. A. E. Percival, C.B., Secretary of the Export Credits Guarantee Department, signed for the British Government.

The loan is being made under Section 3 of the Export Guarantees Act, 1949 and will provide economic assistance to the United Arab Republic. The loan will be repaid over a period of ten years with a grace period of three years before repayments commence. Interest on the loan is at a rate corresponding to the current rate on United Kingdom Government borrowing with a management charge of ¼ per cent.

Total Outstanding Overdrafts of the Nationalized Industries

THE TREASURY announce that the total of the bank overdrafts at July 18, 1962 of the seven authorities to which advances may be made under section 42 of the Finance Act 1956, as amended, was £64.6 million of which £54.8 million was from the clearing banks and £9.8 million from the Scottish banks.

New Copyright Orders

ORDERS in Council were made on July 30, 1962, under the Copyright Act 1956, as follows:

The Copyright (Bermuda) Order, 1962 (S.I. 1962 No. 1642 price 5d., by post 7½d.).

The Copyright (North Borneo) Order, 1962 (S.I. 1962 No. 1643 price 5d., by post 7½d.).

These provide for the extension to Bermuda and North Borneo respectively of the Copyright Act 1956 and Orders in Council made thereunder.

The Copyright (International Conventions) (Amendment No. 3) Order, 1962 (S.I. 1962 No. 1641, price 3d., by post 5½d.).

This takes account of the fact that Canada, Ghana and Nigeria have subscribed to the Universal Copyright Convention, and that the Republic of Mali and the Republic of the Congo (Brazzaville) have subscribed in their own right to the Brussels text of the Berne Copyright Convention.

Copies of these Orders are available at H.M. Stationery Office, Kingsway, London, W.C.2, and branches.

Arrangements for Next Year's Inquiry into the Distributive and Service Trades

AN INQUIRY into the Distributive and Service Trades will be taken next year under the Statistics of Trade Act, 1947, in respect of business done in 1962. As usual, it will be directed mainly to the collection of information about stocks and capital expenditure. It will cover a sample of firms in all the fields which have been covered in previous years, of which the most important are wholesaling, retailing, catering, transport, the motor distributing and servicing trades and property owning. Similar information will be obtained from industry in the Census of Production for 1962.

Some additional information will be obtained at this inquiry from firms in the motor trades, which were not included in the Census of Distribution and Other Services now being taken in respect of 1961. All dealers in new motor vehicles will be asked for returns, together with a sample of other traders (e.g. secondhand dealers, repairers, and filling stations).

The form for motor traders will include a question about turnover in the year, with an estimated division between the following:

Sales of new motor vehicles:
(a) motor cars.
(b) commercial vehicles.
(c) motor-cycles, scooters, etc.

Sales of secondhand motor vehicles.

Sales of spare parts and accessories and receipts from repairs and servicing, including materials and parts used.

Sales of petrol and oil.

All other sales and receipts.

Motor dealers will also be asked to give some particulars of their purchases of vehicles, in order that double-counting of vehicles sold by one dealer to another may be eliminated.

From the information gained it will be possible to improve both the estimates of stocks and capital expenditure, and the estimates of expenditure on motor vehicles. The information collected from the motor trades will also serve as the basis for a continuing monthly inquiry on a voluntary basis, starting in January 1964, which will provide an indicator of current activity similar to those now available for the retail and catering trades.

For further information about the Annual Inquiry for 1962, including full particulars of the questions to be asked, application should be made to the Board of Trade, Census Office, Lime Grove, Eastcote, Ruislip Middlesex. (Telephone: Pinner 8771, Ext. 11.)

Licences to Deal in Heavy Oil for Use as Road Fuel

THE Commissioners of Customs and Excise draw attention to the fact that Section 201 of the Customs and Excise Act, 1952 has been repealed by Section 4(2) of the Finance Act, 1962. Dealers in heavy oil for use as road fuel are therefore no longer required to obtain an excise licence or to furnish to their customers on demand certificates that no rebate of duty has been allowed on the oil.

Retirement of Cotton Board Chairman

THE CHAIRMAN of the Cotton Board, the Rt. Hon. The Viscount Rochdale, has informed the President of the Board of Trade that he proposes to relinquish the Chairmanship of the Board at the end of this year.

Lord Rochdale will have held the office of Chairman for five years at the end of September and it has always been his view that the interests of the industry would be best served if the Board's part-time Chairmen were not to hold office for a greater period than five years. It was his intention, therefore, to resign from the Chairmanship at the end of September, but he has agreed at the President's request to continue in office until the end of the year. The Board of Trade will make an announcement about his successor in due course.

The President has expressed to Lord Rochdale his great appreciation of Lord Rochdale's work as Chairman of the Cotton Board and of the outstanding contribution he has made to the industry's affairs during the last five years.

Notes:

The Cotton Board is a Development Council established by Order under the Industrial Organization and Development Act, 1947. It consists of four members representing the interests of persons carrying on business in the industry, four members representing the interests of persons employed in the industry, and three independent members, including the Chairman. All members are appointed by the President of the Board of Trade.

Lord Rochdale is 56. He is Chairman of Kelsall & Kemp, Ltd., woollen manufacturers of Rochdale; a Past President of the National Association of British Manufacturers (1953-56); and a former Governor of the B.B.C. (1954-59). He is also a Director of Consett Iron Co. Ltd., Geigy (Holdings) Ltd., and Williams Deacon's Bank Ltd. In 1961 he was appointed Chairman of the Docks and Harbours Committee of Inquiry, whose Report is expected to be published later this year.

British Mine Machinery Mission to India

THE issue of the *Board of Trade Journal* for January 19 last, discussed a Mission led by Mr. James Anderson representing eighteen leading British manufacturers of mining machinery and equipment which visited India during December.

The Mission has now submitted its report to the Minister of State at the Board of Trade and the report is being studied. Copies of the report are available for those who wish to see them at the Board of Trade (both the Commercial Relations and Exports Department and the Export Services Branch).

Rubber Stockpile Disposals

THE AVERAGE market price in July having been less than 23½ pence a pound, 700 tons of rubber from the Board of Trade's stockpile have been sold this month, for delivery as follows:

August	35 tons
September	50 tons
October	370 tons
November	245 tons

Approximately 17,100 tons of rubber remain in the stockpile.

Gold and Convertible Currency Reserves

THE TREASURY announce that the gold and convertible currency reserves fell by £185 million to stand at £1,041 million on July 31, 1962. The United Kingdom's repurchase of the outstanding part of her 1961 drawing from the International Monetary Fund reduced the reserves by £183 million.

Purchase Tax on Goods Manufactured for Use In or In Connection With a Business

THE COMMISSIONERS of Customs and Excise wish to draw attention to Section 6, Subsection (3) of the Finance Act. 1962, which provides that a manufacturer who makes, or applies any process in the course of making, chargeable goods **for use** or in connection with a business carried on by him is required to be registered for purchase tax if the wholesale value of these goods exceeds £500 a year, or if the £500 limit is exceeded by the aggregate of the wholesale value of such goods and his reckonable turnover for purchase tax purposes of any chargeable goods manufactured **for sale** or **hire.**

It is the responsibility of manufacturers who are not already registered to apply to their local Officer of Customs and Excise immediately they become liable to registration. As liability to account for any tax due runs from the date on which a trader became registrable all unregistered manufacturers who make goods of a kind chargeable with purchase tax, or apply any process in the course of making such goods, and appropriate or apply them for use in or in connection with a business carried on by them are advised in their own interests to consult their local Officer of Customs and Excise as to their position.

In this connection it should be noted that, for purchase tax purposes, the term 'manufacture' covers not only a person who makes goods himself, but also a person who has his own materials made up or who provides the principal materials from which an article is made for him.

Note: When purchase tax was introduced by the Finance (No. 2) Act, 1940, the person required to be registered and accountable for tax included manufacturers of chargeable goods for sale. The Finance Act, 1954 added manufacturers of chargeable goods for hire. The Finance Act, 1962 now adds manufacturers of chargeable goods for use in or in connection with their business.

Export of Non-Ferrous Scrap

THE Board of Trade announce that in accordance with their existing policy on the export of non-ferrous scrap they are prepared to consider applications to export some Scrap Hard Drawn Copper Wire and Scrap Bronze and Cadmium Copper Wire based on the amounts the applicant held on July 31, 1962.

All applications for export licences should be sent to the Export Licensing Branch, Board of Trade, Gavrelle House, Bunhill Row, London, E.C.1, to arrive on or before August 24, 1962. They must be accompanied by a statement, certified by the applicant's auditors, showing the total unsold stocks of each of these materials held on July 31, 1962.

Inquiries concerning this notice should be addressed to the Engineering Industries Division, Branch 3(B), Board of Trade, Horse Guards Avenue, London, S.W.1. (Tel.: Trafalgar 8855, Ext. 7724.)

The Import Duty Drawbacks (Consolidation) Order 1962

THE TREASURY have made the Import Duty Drawbacks (Consolidation) Order 1962.

This Order consolidates the existing provisions relating to the allowance of drawback of import duty under the Import Duties Act 1958, on the exportation of specified imported articles or goods incorporating those imported articles and of certain goods produced or manufactured from specified imported articles.

The Order comes into operation on August 11, 1962, and has been published as Statutory Instruments 1962, No. 1685.

Anti-Dumping Duty Application on Phthalic Anhydride

THE Board of Trade give notice that they are considering an application for the imposition under the Customs Duties (Dumping and Subsidies) Act 1957 of anti-dumping duties on phthalic anhydride imported from Austria, Belgium and Denmark. The application may be extended to include imports of this product from other countries at prices which appear to be dumped or subsidized.

Any representations which interested parties may wish to make in connection with this application should be submitted in writing not later than August 31, 1962. A statement of the applicant's case will be made available to all interested parties who wish to make representations in the matter if they are prepared to give an undertaking to treat the information contained therein as strictly confidential and to allow their comments to be passed on to the applicants for reply.

Requests for a statement of the case should be addressed in writing to the Tariff and Import Policy Division, Board of Trade, Room 3134, Horse Guards Avenue, London, S.W.1.

List of Board of Trade Departments

IN THE LIST of Board of Trade departments published on page 257 of last week's issue, the telephone number of the Census Office, Lime Grove, Eastcote, Ruislip, Middlesex, should have read Pinner 8771 and *not* 9800.

Visits Overseas by U.K. Businessmen

United Kingdom businessmen travelling overseas are urged, in their own interest, to give advance notice of Trade Commissioners and Foreign Service Officers if they propose to call on them, especially if it is intended to ask for information or other help which it may take time to prepare. It is often advisable to telephone for an appointment on arrival.

Export Services Branch and the Regional Offices of the Board of Trade, if approached, will pass information about pending business visits to Overseas Officers and provide letters of introduction.

Commonwealth Trade in 1961

EXPORTS FROM the Commonwealth countries were 4 per cent. more in aggregate in 1961 than in 1960, thus continuing the almost uninterrupted expansion which has taken place since 1954. The value of imports was 2 per cent. less than in 1960. This reduction in aggregate Commonwealth imports was mainly in the trade between Commonwealth countries; it was reflected in their exports. Exports from Commonwealth countries to each other were 4 per cent. less in value in 1961 than in 1960 whereas exports to non-Commonwealth countries were 8 per cent. more. These developments continued the trend, which has been apparent in recent years, of a growing importance of trade with non-Commonwealth countries compared with that within the Commonwealth.

Exports

Between 1954 and 1961 total exports from the Commonwealth to non-Commonwealth countries increased by 55 per cent., an annual rate of 6½ per cent. There was a similar rate of increase in exports to the Common Market countries and exports to the United States expanded by 47 per cent. Over this period, and particularly in recent years, there have been even larger increases in exports from Commonwealth countries to areas other than continental Western Europe and North America; important elements in this were trade with Eastern Europe and with the Far East. There was an increase of only 13 per cent. in exports from Commonwealth countries to each other between 1954 and 1961. By 1961 these exports represented about 35 per cent. of total Commonwealth exports, compared with 38 per cent. in 1960 and about 42 per cent. in 1954.

Total exports from Commonwealth countries to all areas increased by 37 per cent. between 1954 and 1961; compared with 1960 there was an increase of 4 per cent. Of the 1961 aggregate Commonwealth exports of £9,624 million, £3,841 million or 40 per cent. was accounted for by exports from the United Kingdom. United Kingdom exports continued to increase slightly more than those from other Commonwealth countries as a group, but there was a wide variation in the experiences of individual member countries. Of the larger exporters, Canada's total exports to all areas in 1961 were about 5 per cent. higher than in 1960 and at 22 per cent. were about the same percentage of total Commonwealth exports as in 1960. Australia's total exports in 1961 of £833 million were 18 per cent. higher than in 1960; they represented about 8 per cent. of total Commonwealth exports compared with 7 per cent. in 1960.

Exports to the United Kingdom from the rest of the Commonwealth in 1961 were 6 per cent. below the 1960 level and at £1,262 million were only 1 per cent. higher than in 1954. Trade between the overseas Commonwealth countries was also reduced in value in 1961, by 3 per cent. Exports from overseas Commonwealth countries to the United States, their largest single market, increased again after a fall in 1960 and were about 40 per cent. more than in 1954. There was a similar increase during this period in exports to the Common Market countries. Exports to non-Commonwealth countries as a whole increased faster and in 1961 were 9 per cent. more by value than in 1960 and over 50 per cent. more than in 1954; exports of wheat to China contributed to this.

United Kingdom exports to other Commonwealth countries fell by 3 per cent. last year to a level 17 per cent. more than in 1954; exports to non-Commonwealth countries rose by 8 per cent., to 56 per cent. more than in 1954. While exports to the United States fell by 13 per cent. between 1960 and 1961 this market continued to show the greatest expansion compared with 1954.

Imports

Total imports into the Commonwealth from all sources decreased in 1961 by 2 per cent. compared with 1960; at £10,880 million were 40 per cent. more than in 1954. Imports into Commonwealth countries from other Commonwealth countries in 1961 were 4 per cent. below the 1960 level whilst imports from non-Commonwealth areas were much the same as in 1960. Of the non-Commonwealth sources, imports from the United States were 3 per cent. lower than in 1960 whilst imports from European Economic Community and European Free Trade Area (excluding the United Kingdom) were in each case 1 per cent. higher than in 1960. Between 1954 and 1961, imports from non-Commonwealth sources into Commonwealth countries increased by 60 per cent.; from the United States the increase was 57 per cent. and from the European Economic Community 79 per cent., but imports from Commonwealth sources increased by 13 per cent.

Most of the fall in Commonwealth imports in 1961 was attributable to the United Kingdom where imports were 3 per cent. less than in 1960. Imports from other Commonwealth countries were 5 per cent. lower, and those from the United States 15 per cent. lower; there was a small increase, 2 per cent., in imports from the European Economic Community. The latest figures thus leave unaltered the picture of medium term development from 1954. This is one of little change in the value of imports into this country from other Commonwealth countries (the fall in prices was offset by a rise in quantities) but a marked growth in imports from the various non-Commonwealth sources. Imports into overseas Commonwealth countries continue to show moderate growth in imports both from the United Kingdom and from each other with much more rapid growth in imports from the various non-Commonwealth sources.

Of the wide range of experience of individual countries in 1961, the most important changes were the falls in imports into Australia, India and Ceylon (particularly Australia), and the higher imports into New Zealand, Canada and the West Indies.

Passenger Movement

1961 Shows the Highest Figure Yet Recorded

OVER fourteen million passengers travelled to and from the United Kingdom in 1961, nearly one-and-a-half million more than in 1960. Sea figures increased by 3 per cent. and air figures by 18 per cent., mainly in traffic to and from the Continent.

Continental Routes

Total movement to and from the Continent rose by 12 per cent. The continuing popularity of air travel on these routes was reflected in the 20 per cent. increase – 23 per cent. in 1960; sea travel rose by only 5 per cent.

As in 1960, all European countries shared in the increase in air travel.

The downward trend in the number of passengers carried in British vessels was halted, 14 per cent. more being carried than in 1960.

Table 1. Summary of United Kingdom Passenger Movement

(Excluding movement across the land frontier between the Irish Republic and Northern Ireland, passengers travelling between the Channel Islands and Great Britain, passengers carried in aircraft chartered by British Government Departments and, as far as possible, passengers travelling by sea on pleasure cruises and day trips, and H.M. and other armed Forces travelling in the course of their duties.)

(*a*) The differences in the *air* figures for 1959 and 1960 from those published previously result from the inclusion of the Mediterranean Area and the Middle East countries with the Continent of Europe from the beginning of 1961 and the back-dating of this change for comparison purposes.

Non-European Routes

Travel between the United Kingdom and countries outside Europe increased by 5 per cent.: there was a decline of 4 per cent. in sea traffic.

The numbers of United Kingdom residents and overseas Commonwealth visitors travelling by the long sea routes fell by 5 per cent. in 1961, but migration increased slightly. The number of aliens travelling on the long sea routes fell by 11 per cent.

Irish Republic

Passenger traffic to and from the Irish Republic again rose by 6 per cent. Sea traffic remained at the same level as in 1960; air traffic rose by 18 per cent. after the sharp increase of 30 per cent. in the previous year.

Output of the Wool Textile Industry

THE VOLUME of production in the wool textile industry in June was 16 per cent. less than a year earlier. This comparison is clouded by the changing date of Whitsun and when the months of May and June are combined the volume of production was 7 per cent. less than in the corresponding months of 1961.

Figures issued by the Wool Industry Bureau of Statistics show that, if allowance is made for the length of the working month, production in June of tops and deliveries of worsted yarn were 16 and 11 per cent. less respectively than in June 1961. Deliveries of woven fabrics (excluding blankets) were 8 per cent. less.

In the first six months of the year total deliveries of worsted yarn and deliveries of woven fabrics were 8 per cent. and 3 per cent. less respectively.

The total value of manufactures of the woollen and worsted industry (tops, yarns, woven fabrics, etc.) exported in the second quarter of 1962 was £29.7 million, slightly less than in the first quarter of the year and 3 per cent. less than in the second quarter of 1961.

Compared with the previous quarter the value of tops exported was 7 per cent. more, but the value of woven fabrics 4 per cent. less; woollen woven fabrics increased by 3 per cent. but worsted woven fabrics were 12 per cent. less.

Deliveries in the Made-up Clothing Industry

MANUFACTURERS' sales of made-up clothing in June were 6 per cent. less than in June 1961. The changing date of Whitsun may have affected this decrease but taking the three months of April, May and June together deliveries were 5 per cent. less than in the same months last year. In the first six months of this year deliveries were 4 per cent. less than in the corresponding period of 1961.

In the three months April-June deliveries in all sectors were less than they were last year; deliveries of weatherproof outerwear were 10 per cent. less than in the same period a year earlier. Deliveries of men's and boys' and women's and girls' tailored outerwear were 2 and 6 per cent. less respectively and dresses, lingerie, infants' wear, etc. 8 per cent. less.

The index numbers below, which are of manufacturers' sales at constant prices, have been adjusted for the length of the working month but not for holidays or other seasonal factors.

GIFT TIME CALLS FOR A . . .

NEWMARK Fonetimer

Here's the very latest gift idea for 'phone users at home or abroad. Remember—France, Germany and Switzerland use the timing system for telephone calls. The Newmark Fonetimer is used to dial the number, when a reply is received the caller just presses down the gilt cap and the Fonetimer automatically registers from 1-6 minutes.

As each minute passes the Swiss precision timing device reveals a coloured and numbered ring. If the call takes longer than 6 minutes the timer can be reset by pressing the cap again.

A Fonetimer is the smartest way to 'phone economy and it costs only 27/6 retail. Your Company name or a message can be stamped on the Fonetimer.

Questions in Parliament

Below is a selection of questions of interest to industry asked and answered in Parliament.

Thursday August 2

U.K. Imports of Flax Seed or Linseed

Mr. Frederick Erroll, President of the Board of Trade, was asked if he would state the countries from which linseed was imported in 1961, together with the quantities obtained from each.

The following information was given:

U.K. IMPORTS IN 1961 – FLAX SEED OR LINSEED

	Quantity	Value
	Tons	£
Cyprus	51	3,850
Canada	150,431	7,899,928
Western Germany	20	950

Consumer Complaints on Children's Shoes

Asked if he was aware of growing complaints about the poor quality of children's shoes; and what steps he was taking, by legislation or otherwise, to protect the consumer in this respect, the President replied:

'I am aware that there is disappointment at the inability of the industry to agree upon a new British standard for children's footwear, but I do not think that complaints have been growing or that standards can be imposed by legislation. In my opinion a sufficiently wide selection of children's shoes are now available on the market to afford buyers a reasonable choice of price and quality'.

Jenkins Committee Evidence

Asked if he would arrange for the publication of the names of those who submitted written evidence to the Jenkins Committee on Company Law, the President said:

'No. Nearly 400 persons and institutions submitted written evidence varying from a comment on a post-card to lengthy memoranda. I do not think that publication of the names of all these contributors would be justified. The Committee placed on record in their report their indebtedness to all who gave evidence, whether written or oral'.

Friday August 3

Monopolies Report on Fertilizers

Asked if he had now concluded discussions with fertilizer manufacturers on the matters raised by the Report of the Monopolies Commission on the Supply of Chemical Fertilisers; and if he would make a statement, the President said:

'Yes. The Monopolies Commission recommended that Fisons Ltd. should adjust their pricing policy to yield a lower level of profit than that earned in the years investigated; the firm immediately accepted this criticism and announced that their prices had already been reduced. The Commission did not criticise the profits being earned by Imperial Chemical Industries Ltd. and made no recommendations about that Company. Imperial Chemical Industries Ltd. have subsequently given the Board of Trade access to their books as a result of which I am satisfied that their profits since have not been unreasonably high. There has in fact been a marked increase in competition within the fertilizer industry since it was investigated by the Monopolies Commission.

'However, since farmers are paid a substantial subsidy on the chemical fertilizers they use I have sought and obtained from these two companies assurances that they will not seek unreasonable profits from the materials for which they were found by the Monopolies Commission to be monopoly suppliers, and the two companies have agreed to afford to accountants appointed by me facilities to verify regularly that these assurances are being observed.

'The Ministry of Agriculture, Fisheries and Food have been closely associated with my Department in the discussions with the two companies.

'In view of these assurances I am satisfied that the profits which will be earned by Imperial Chemical Industries Ltd. and Fisons Ltd. from chemical fertilizers will not be unreasonably high, having regard to the average rate of return on capital earned in manufacturing industry generally.'

The National Advertising Exhibition

THE NATIONAL Advertising Exhibition - 'Adex 1962' - will be held at Olympia from September 10-15, 1962. It is sponsored by World Press News and Advertisers' Review, and will be opened by Mr. Frederick Erroll, President of the Board of Trade.

Over 100 exhibitors from home and overseas will occupy 138,000 sq. ft. of exhibition space. The display will feature printing, photography, direct mail displays, advertising films, commercial art, block-making, points of sale, signs, advertising novelties and will endeavour to give a cross section of all aspects of advertising and its ancillary industries. Although there have been five previous advertising exhibitions the 'Adex 1962' will be the first to present the advertising business as a major industry in its own right.

Visitors to 'Adex 1962' are expected from all parts of the world particularly from Common Market Countries, the Commonwealth and the United States. Further information can be obtained from the organizers: Adex Ltd., Advertising Exhibition Promotions, 9-10 Old Bailey, London, E.C.4. (Telephone: Central 4040.)

British Textiles Won 38 Gold Medals at California State Fair

THIRTY-EIGHT gold medals won by twenty British textile firms exhibiting in the International Fabrics Exposition of the California State Fair at Sacramento in May were presented by Mr. Alan Green, Minister of State, Board of Trade, at a reception given by the Western Hemisphere Exports Council at their London headquarters last week.

The presentation ceremony, presided over by Lord Rootes, Chairman of the Western Hemisphere Export Council, marked an outstanding performance by the British textile industry. In all, the United Kingdom companies gained more than 43 per cent. of the total number of medals awarded in all classes. The Exposition attracted 154 separate entries from nine countries. British manufacturers concentrated on apparel, upholstery and drapery fabrics in satin, silk, wool, man-made fibres and blends and also on rugs in blends and wools.

In presenting the medals to directors and designers of the award winning firms, the Minister congratulated them on a first class achievement. He said that very many of the textile industries overseas owed their genesis to British skills and enterprise and it was all the more gratifying that the old mastery was still evident when the world met in competitions such as the California State Fair. It was vital to our export trade that we should maintain the highest reputation for quality while responding to trends in design and making use of new materials.

Commenting on the significance of this success being achieved in California – one of the most prosperous and expanding markets in the United States – the Minister said that if our textiles were good enough to win a flock of medals there, they were also good enough to win substantial export orders. 'You can depend on it', he added, 'that the Board of Trade and our Commercial officers on the spot will do all they can to help.' Referring to the rapid industrial and population growths in the American's western states

in general and to California in particular, the Minister commented that this great western market was more accessible to our exports than many people realized.

The Minister said he would urge British firms who have so far concentrated on the Eastern States to regard California as another great market. Those firms who had not yet tried to export to America might well consider starting in the New West.

In a closing reference to 'London Week' to be held in San Francisco in November, the Minister said this was one of the ways in which the Board of Trade sought to stimulate British sales on the American West Coast.

'I hope to make a visit myself', he continued, 'and to see when I get there the most varied collection of British goods in Californian stores. I shall look for textiles, of course.'

'London Week' in San Francisco presents some interesting and practical possibilities for firms already in the Californian market and for others not yet there. Anyone wishing to know more about this event should get in touch with the Board of Trade Export Publicity and Fairs Branch at Horse Guards Avenue, London, S.W.1. As we see today – those who go are quite likely to win a well earned medal; but if you don't go, you can't win!'

Commending the textile industry's achievement in California and emphasizing the tremendous opportunities for the expansion of British exports to the American West Coast, Lord Rootes paid a generous tribute to the work of the Board of Trade and the British Consulate-General in San Francisco to this end. London Week was one of the highlights in the continuing effort to foster British prestige on the West Coast and he urged British industrialists to make the best use of the opportunities which would be afforded next November.

Lord Rochdale, Chairman of the Cotton Board, added his personal congratulations to the medal winners. He said their achievement in California was a fitting rejoinder to the Jeremiads who talked about the decline of the British textile industries. Textiles were a very important factor in our export effort and this latest success was some indication of the developments in the British industry in the last few decades; developments which gave wonderful value in excellent cloths and in really good designs.

Planning Overseas Exhibitions

When 23 industrialists, including export and advertising specialists, visited the Central Office of Information recently, they saw how British industry is put on show overseas by C.O.I.'s Exhibitions Division which since 1959 has been responsible for all official United Kingdom fairs and exhibitions abroad.

The work ranges from major large-scale exhibitions like the British Pavilion at the World's Fair at Seattle, which has already been seen by over a million visitors, to small touring exhibits made up in easily transportable units for handling by the British Information Services.

More than half the work of the Division (which has its own design teams, exhibition managers, scriptwriters and drawing office) is carried out on behalf of the Board of Trade at industrial and trade fairs abroad. Recent successes include Gold Awards at the Rand Easter Show in Johannesburg and the Central African Trade Fair, Bulawayo.

New Edition of Trade Fairs Guide

A **fourth edition** of the booklet 'Trade Fairs Help Exports—Hints For the Small Exhibitor' has been produced by the Board of Trade for the guidance of small firms contemplating exhibiting overseas for the first time. The booklet explains the purposes of exhibiting and gives guidance on the choice of fairs, the organization of exhibits and on official assistance available to the British exhibitor. It also lists major specialized fairs overseas. Copies can be obtained free of charge from any Board of Trade Regional Office or from Export Publicity and Fairs Branch, Board of Trade, Horse Guards Avenue, London, S.W.1. Tariff, Customs, Import and Other Regulations in Overseas Countries

Registered Trade Mark (rtm) Goods in Overseas Tariff Lists

THE LISTS OF TARIFF, Customs and import regulation changes in overseas countries published in this section of the Journal sometimes contain words which are registered trade marks in the United Kingdom. So far as is practicable, all lists of goods are checked before publication from this point of view.

Items which fall into this category will now be prefixed by the letters 'r t m'. Readers of the Journal should note that this prefix signifies that the words are registered as trade marks in the United Kingdom, but that in the present context they are assumed to refer generally to products of the description stated in brackets.

While every attempt will be made to ensure that the scrutiny is complete, the lists may contain other words which are registered as trade marks in the United Kingdom or in other countries but which it has not been possible to identify.

H.M. EMBASSY at Montevideo report that a recently aprroved Uruguayan decree increases the surcharges payable on imports of motor cars and components to 300 per cent. and 150 per cent. respectively. Full details of the decree will be published as soon as it is received.

BRAZIL

Testing of Agricultural Machinery and Tractors

A BRAZILIAN Decree published in January 1961 (see *Board of Trade Journal* of February 24, 1961) laid down that all agricultural tractors, implements, machinery and tools must be tested by the Brazilian Ministry of Agriculture before being offered for sale in the country.

Motors, farming machinery and tools have been temporarily suspended from these requirements by Decree No. 767 of March 23, although tests will still be carried out on tractors and their implements.

UNITED STATES

Export Control Act Extended

PUBLIC LAW 87-515, approved on July 1, 1962, extends until June 30, 1965, the authority provided by the Export Control Act of 1949 for the regulation of exports from the United States.

Import of Bees

PUBLIC LAW 87-539, approved on July 19, 1962, prohibits the import into the United States of all honey bees of the genus Apis in the adult stage. Exceptions to this prohibition may be allowed if the Secretary of Agriculture determines that an exporting country is free from diseases dangerous to adult bees and has taken adequate precautions to prevent imports from countries where such dangerous diseases exist. Imports by the United States Department of Agriculture for scientific or experimental purposes are also excepted.

provisions for imports of sugar into the United States during the next 2½ years.

Revised import quotas are established for an enlarged list of countries. The quota allotted to Cuba is reserved under a requirement forbidding the implementation of quotas for countries with which the United States is not in diplomatic relations. The quantity involved will instead be made available for import from other countries, subject to a proviso that special consideration be given to Western hemisphere countries and countries buying United States agricultural commodities. A new prohibition is imposed on imports of sugar from countries which are net importers of sugar and, because of this, no imports will be allowed from Britain.

A special fee is imposed on imports, based on the amount by which the domestic price of sugar in the United States exceeds the foreign market price. The full amount of the difference will be charged on non-quota imports, while quota imports will pay 10 per cent. of the full amount during the second half of this year, 20 per cent. in 1963 and 30 per cent. in 1964.

New provisions are introduced in respect of imports of products containing sugar. In general, the import of any such product will remain unrestricted if it is the same or essentially the same in composition and use as a sugar-containing product which was imported during any 3 or more of the 5 years 1955-59 without being subject to restrictions under the Sugar Act. The import of any other sugar-containing product will in general be subject to the quotas and other restrictions on sugar. Exceptions to these general rules may, however, be made at the discretion of the Secretary of Agriculture. The criterion will be whether unrestricted imports of the product would or would not substantially interfere with the purposes of the Sugar Act.

The import taxes imposed under Section 4501 of the Internal Revenue Code of 1954 on manufactured sugar and articles in chief value of sugar are extended until June 30, 1967.

Inquiries about this notice should be addressed to Commercial Relations and Exports Department (United States Branch), Board of Trade, Horse Guards Avenue, London, S.W.1. (Telephone: Trafalgar 8855, Ext. 2856.)

GHANA

Customs and Excise Notice to Importers

Entry of Goods Where Freight, Insurance And Other Charges Are Paid In Ghana

THE Comptroller of Customs and Excise published the following notice in the Commercial and Industrial Supplement to the Ghana Gazette of July 20, 1962.

1. This notice sets out the modified procedure required for the entry of imported goods liable to *Ad Valorem* duty where the importer pays the freight, insurance or other charges in Ghana.

2. Under the powers vested in me by section 257 of the Customs Ordinance I direct that where imported goods liable to *Ad Valorem* duty are invoiced at prices other than C.I.F. and freight, insurance or other charges are to be paid in Ghana by the importer, it will not be necessary for the supplier to show these details on his Customs invoice.

3. The importer or his legally appointed agent will make a declaration, in the prescribed form, on Form C.70 of his import value. This declaration must be supported by the supplier's Customs invoice and documentary evidence of charges paid directly by the importer. Documents relating to freight and insurance, in addition to the total charge, must show the rate of freight and insurance and, in the case of freight, the weights and measurements of the packages. Copies of the prescribed form are available for inspection at all Customs Houses.

4. The importer when making entry under this concession will make reference to this notice on his entry in the following terms:

'Import Value calculated under the terms of *Gazette* Notice No. of 1962.'

5. This alteration in the present procedure does not in any way vary the requirement that the suppliers invoice must be signed, witnessed and, where necessary, certified.

6. This new procedure will become operative from October 1, 1962.

SINGAPORE

Pioneer Industries Ordinance

THE BOARD OF TRADE has been informed by cable that the Singapore Government proposes to declare the following industries and products to be Pioneer Industries and Pioneer Products under the Pioneer Industries (Relief from Income Tax) Ordinance 1959:

Industries	Products
(A) Structural clay products manufacture	(i) Clay bricks (ii) Clay hollow blocks (iii) Clay sewer pipes
(B) Ceramics manufacture	Ceramic ware
(C) Manufacture of furniture and fixtures	Steel office furniture and accessories other than tubular furniture
(D) Metal manufacture	Safes
(E) Photographic goods manufacture	Sensitized photographic paper
(F) Carbon paper manufacturing	Carbon paper

This notice means that the Minister of Finance is satisfied that the products mentioned above should be made in Singapore. Firms to which Pioneer Certificates are granted will enjoy the benefit of exemption from Singapore Income Tax for a period of five years. Any person may object to the making of the proposed Order by giving notice in writing to the Minister of Finance, on or before August 31, 1962.

Further information about the Pioneer Industries Legislation may be obtained from Commercial Relations and Exports Department, Board of Trade, Horse Guards Avenue, London, S.W.1. (Tel.: Trafalgar 8855, Ext. 2317.) Please quote reference C.R.E. 11038/60.

AUSTRALIA

Special Advisory Authority Results

A NOTICE was published in the *Board of Trade Journal* on June 29, 1962, pages 1453/54, to the effect that references had been made to the Australian Special Advisory Authority in respect of **parts for refrigerating appliances and trichlorethylene.**

These inquiries have now been held and as a result of the Special Advisory Authority's recommendations, temporary additional duties have been imposed as follows:

(1) £1 10s. 0d. each (Australian currency) on compressors not exceeding ¼ h.p. (Tariff Item 175 (C)).

(2) 10 per cent. *ad valorem* on compressors exceeding ¼ h.p. but not exceeding 5 h.p. (Tariff Item 175 (C)).

These new duties do not apply to goods in transit on or before June 22, 1962. Further details will be published in the next issue of the *Board of Trade Journal*.

No temporary additional duty has been imposed on trichlorethylene (Tariff Item 280 (K) (1)).

Special Advisory Authority Result

A NOTICE was published in the *Board of Trade Journal* on July 6, 1962 (pages 48-49) to the effect that a reference had been made to the Special Advisory Authority in respect of certain penicillins and their salts, streptomycin sulphate and admixtures of certain penicillins or their salts with streptomycin sulphate.

The inquiry has now been held and as a result of the Special Advisory Authority's recommendations temporary quantitative import restrictions, which replace the current temporary duties, have been imposed.

Imports of **Benzylpenicillin and its salts,** classifiable under Tariff Item 280 (R), **Phenoxymethylpenicillin and its salts,** classifiable under Tariff Item 280 (S), **Streptomycin Sulphate,** classifiable under Tariff Item 280 (T), will be licensed on the basis of one imported unit for each nine locally produced units purchased after the date of operation of the quantitative restrictions.

Imports of **Goods Covered by Tariff Item 285 (A) (1)** will be subject to import quotas by quantity on the basis of 20 per cent. per annum of each importer's imports during the year ending June 30, 1962.

Goods in transit on or before June 29 will be licensed without debit to quota.

Further details will be published as soon as possible.

Tariff Board Inquiries

THE AUSTRALIAN Minister of Trade has referred to the Tariff Board for inquiry and report the question whether assistance should be accorded the production of **parts for refrigerating appliances,** viz: compressors, evaporators and sealed or semi-sealed units including mechanical driving units not exceeding 10 brake horse power and apparatus for transmitting power from such driving units to the driven units, combined or separate. (Tariff Item 175 (C)) and parts thereof (Tariff Item 175 (C)).

Details of this Tariff Item as now amended will be published in the next issue of the *Board of Trade Journal* under the heading "Tariff Changes".

(2) The Australian Minister of Trade has also referred to the Tariff Board for inquiry and report the question whether **phthalic anhydride** (Tariff Item 280 (H)) should be gazetted under Section 7 of the Customs Tariff (Dumping and Subsidies) Act, 1961.

Details of the provisions of Section 7 of the above-mentioned Act were published in the *Board of Trade Journal* on June 2, 1961 (page 1326).

These matters have been reported by telegraph by the British Senior Trade Commissioner at Canberra, who has been asked by the Australian authorities to notify them at the earliest possible date if any United Kingdom interests propose to tender evidence. In accordance wih normal procedure, notification in this instance should be given to the Australian authorities **(not later than August 24, 1962.** Before this date, therefore, United Kingdom Trade Associations or firms intending to submit evidence to the Tariff Board should so advise the Commercial Relations and Exports Department, Board of Trade, Horse Guards Avenue, London, S.W.1, quoting reference Nos. (1) C.R.E. 8578/62 and (2) C.R.E. 8579/62.

Import Licensing Controls (Timber)

A NOTICE was published in the *Board of Trade Journal* on July 27, 1962 (page 237), giving details of the recently introduced import licensing controls on certain types of timber imported into Australia.

The Australian Department of Trade has now advised that balsam should be added to Category Item 291 H 'Douglas fir and hemlock' because of its similarity to hemlock.

The Schedule of Categories should be amended accordingly.

PLANNING BUSINESS DOWN UNDER?

The Bank of New South Wales

will put you in the picture

The Bank of New South Wales can't exactly draw everything out of the hat for you, but if you're planning business Down Under you couldn't gain a clearer picture of current Australian and New Zealand situations than from us.

We've been in Australasia since 1817. We were the first bank there; we still are. Today we have over 1,150 offices throughout Australia, New Zealand, Fiji, Papua and New Guinea all providing key services, many of which are special to the Bank of New South Wales.

We find customers take their hats off to our initiative and sense of judgment. We doff ours to them too, of course. There's mutual interest and respect between the 'Wales' and our customers.

Are you exporting
part of your profit?

YOUR BOAC CARGO AGENT CAN SAVE YOU MONEY

You get special low rates. Your BOAC Cargo Agent saves you money two ways. Firstly, handling goods for a number of clients, he buys freight space at special bulk rates—and passes the saving on to you. Useful economy for the small exporter!

He spares you deskwork. Secondly, he makes sure your exports fly out on schedule, leaving you free to deal with other business matters. The time and trouble saved will be reflected in your profits, particularly if you are a big exporter.

BOAC speeds delivery, cuts costs. Whatever the size of your export business, it makes sense to send your goods by BOAC—and let the Cargo Agent do the work. Speedy delivery, cuts in the costs of labour, packaging and warehousing—all this means savings for you. For the address of your nearest BOAC Cargo Agent contact your nearest BOAC office.
